

ELECTRONICS FOR KIDS

Course Description

This course teaches kids basic electronic components and simple circuits. Students learn to build circuits with snap building blocks and electronic breadboard. We provide step-by-step instructions and videos to help students understand basic concept of electronics. Supporting STEM education initiatives, this course introduces kids to electronic world and opens doors for future development. (For Grade 3+ students)

Lesson 1: Introduction
Lesson 3: LED and Music
Lesson 5: Police Siren
Lesson 7: AND & OR Circuit
Lesson 9: Button & Buzzer

Lesson 2: Light & Sound
Lesson 4: Alarm Circuit
Lesson 6: Period Sound
Lesson 8: Breadboard
Lesson 10: Potentiometer

AMERIDUO
Innovation starts with **YOUTH.**

We demystify a complex technology

We provide an effective way of introducing programming to students

We help students develop critical thinking skills

We teach students how to turn frustration into innovation

Our students enjoy hands-on construction activities
